JODI 'JBJ' KANSAGOR

Experienced Front-end Software Engineer

503.957.6543 | jodinkansagor@gmail.com | linkedin.com/in/jodikansagor

TECH & TOOLS

Javascript	NodeJs
Typescript	Express
React	MongoDB
Redux	PostgreSQL
MobX	Git
HTML	Azure DevOps
CSS	New Relic
Material UI	Postman
Cypress	Contentful
Playwright	Optimizely
Jest	Split
Storybook	React Testing Library
Figma	GraphQL and REST APIs

LEADERSHIP SKILLS

- Strategic planning and execution
- Cross-functional leadership and collaboration
- Project management and delivery
- Strong creative problem solving
- Commitment to learning and growth

ACADEMICS

Alchemy Code Lab
FULL STACK JAVASCRIPT PROGRAM

Portland State University
MBA

Boston University
BA, EVOLUTIONARY BIOLOGY

Portland Community College
CERTIFICATE IN GEOGRAPHY INFORMATION SYSTEMS

PROFESSIONAL EXPERIENCE

Senior Software Engineer, New Relic
September 2021 – *Current*
Tech: Typescript, React, GraphQl, Playwright testing

- Lead projects to create and maintain features for a first-class browser and mobile app observability product using React and Typescript
- Coordinate multiple cross-team long-term projects, driving success and efficiency across the organization
- Lead technical decision making for the team as well as contribute to broader strategic goal setting initiatives
- Develop deep knowledge of New Relic data, querying via New Relic Query Language
- Co-lead the UI Community of Practice and Technical Book Club, supporting knowledge sharing and professional development within the organization
- Organize and facilitate a yearly internal UI Unconference to foster a culture of continuous learning and collaboration
- Advocate for accessible design principles in alignment with WCAG guidelines, ensuring inclusivity and usability of products
- Mentor junior engineers, providing guidance on best practices, coding standards, and professional development opportunities.

Software Engineer, Lithia Motors & Driveway
March 2020 – September 2021
Tech: Typescript, React, Material UI, MobX, React Context, GraphQl

- Developed and managed components and pages for search, filter, and sorting functionalities in a large e-commerce application
- Led the creation and deployment of a responsive e-commerce UI within a 6-month timeframe, exceeding project expectations.
- Guided technical decision-making and contributed to organizational architectural planning
- Collaborated with Product, Delivery, and Design teams to deliver top-quality features on schedule
- Maintained a custom component library and design system with Storybook, streamlining development processes and ensuring consistency across the application
- Advocated for accessible design aligned with WCAG guidelines.
- Mentored student interns to support their professional growth.
